

StarUml Representation

This document serves as a companion for the StarUML representation of our app, **MediCliqu**.

The presentation illustrates the interactions among various potential users of our application, mainly Clients, Doctors, and Med-Drivers, highlighting their specific needs.

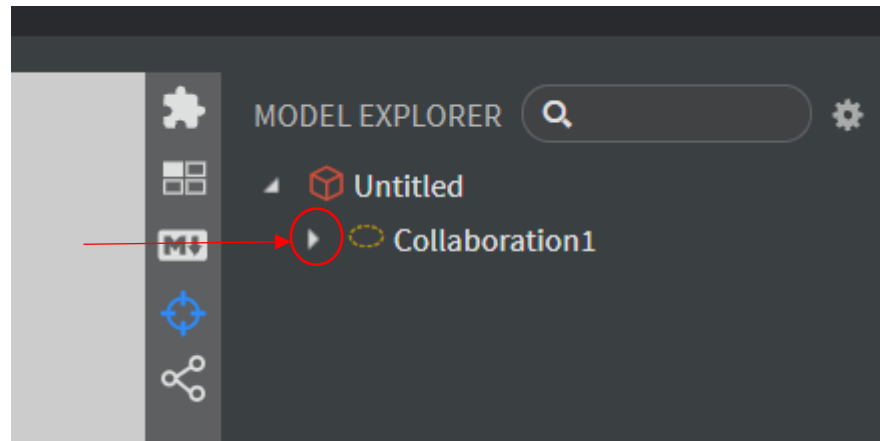

Help (This part is in case of an empty screen in StarUml like this photo)

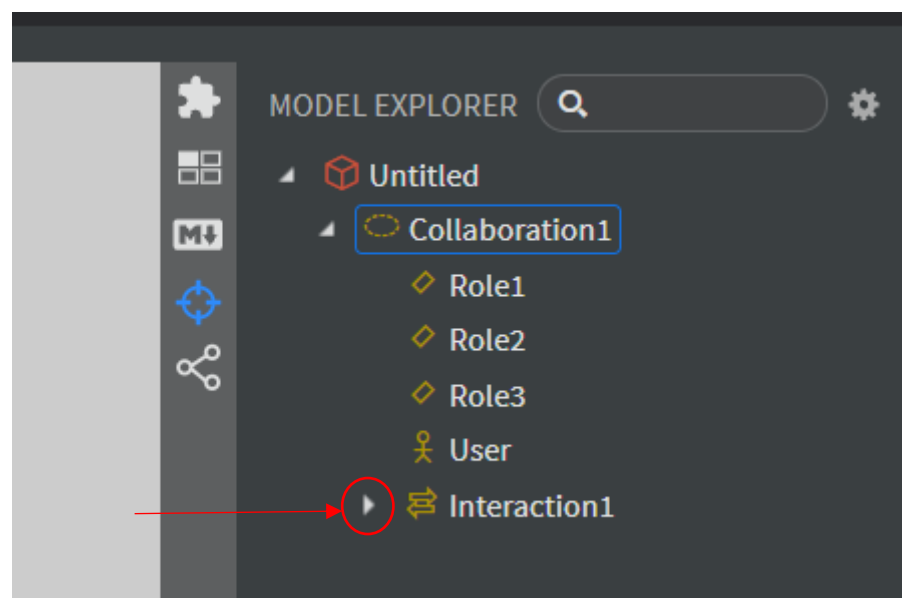

To proceed please follow these instructions:

BlockBusters

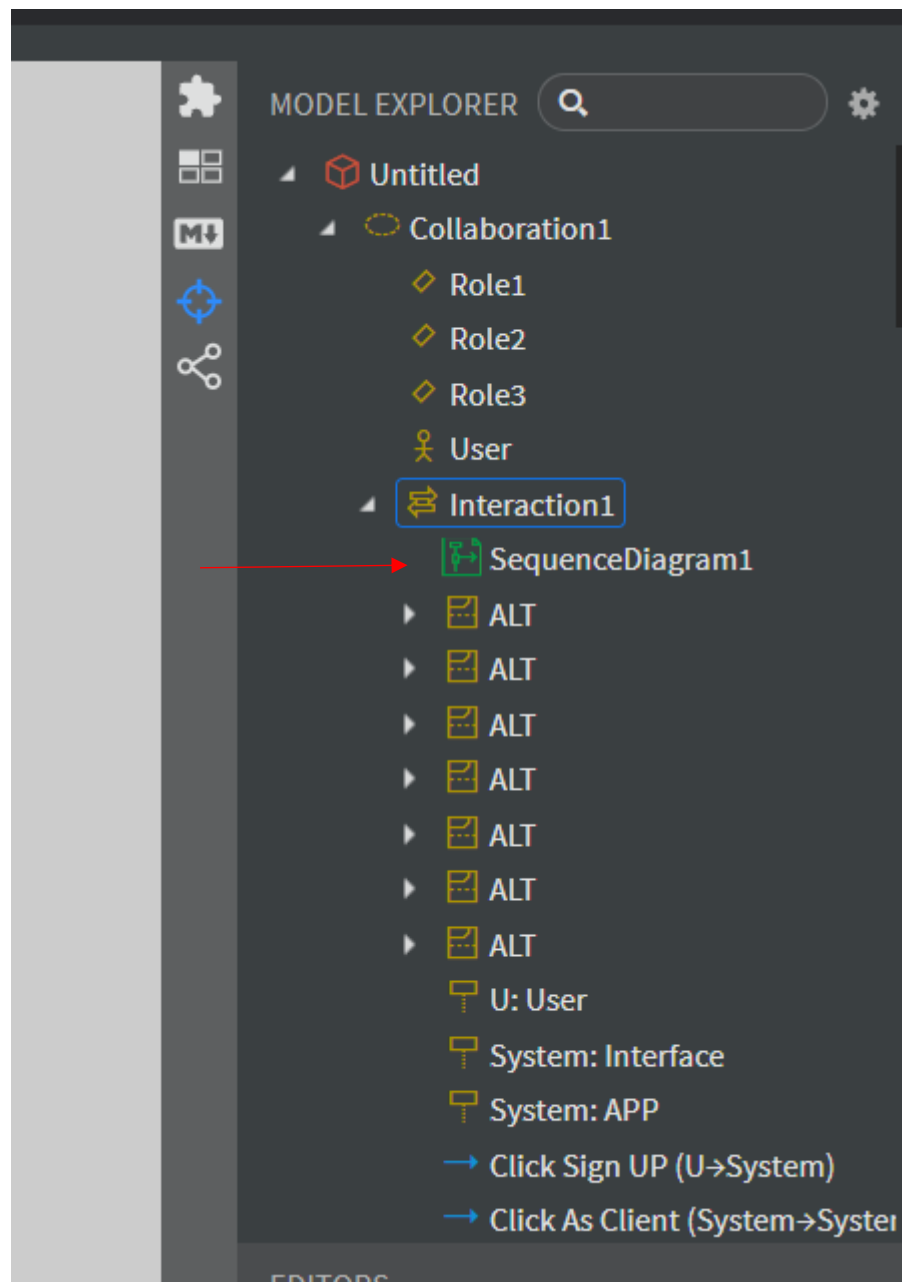

1. Click On side of Collaboration 1

2. Click On side of Interaction 1

3. Double Click on SequenceDiagram1

These Instructions are applicable on all files of StarUml

(Client__, Doctor__ and Driver__), if any problem faced or what so ever please do contact the team leader of our group (Mohamed Rayen Frikha)

Via Mail or personal Phone
